COVALENCE COMPLETE

# **Monitor, detect, analyze, respond.** Leading automation, managed by experts.

covalence.fieldeffect.com

FIELD EFFECT™
Cyber security that keeps business moving.

FES-COV-CMPLT-V2-01-2021

## Automated, managed cyber security. We do that.

Your company's IT infrastructure is dynamic and forever-changing as employees use new devices, update software, and connect from unique locations. Securing all these moving parts is nearly impossible when you lack the tools or resources necessary for success.

## The result? All those hours once devoted to meeting business goals are now spent worrying about cyber security.

Instead of always playing catch-up, secure your business with a platform powerful enough to proactively identify vulnerabilities, detect cyber threats and risks across your networks, cloud services, and endpoints, and provide the functional insights to resolve them.

THE CHALLENGE

# **Nearly 50% of a company's cyber security risk** stems from the complexity of managing multiple products or vendors.

*Eliminate that risk with one solution for all your threat detection and response needs.*

Continuous infrastructure monitoring is arguably the best way to stay ahead of cyber risks. But with growth comes complexity, and keeping up with an ever-changing network will require time, skills, or resources that you may not have.

And worse, traditional cyber security solutions are often too complex to configure, deploy, and integrate. These tools can't keep pace with a dynamic business environment, and you may end up with dangerous security gaps.

THE SOLUTION

## **Your modern business deserves robust threat monitoring, detection, and response that works across any combination of cloud assets, on-premise networks, endpoints, and operating systems, no matter where you are.**

The right solution offers a continual view of potential cyber risks and malicious activity. With data-driven insights and a team of real experts on your side, you can prevent cyber threats and eliminate security vulnerabilities easily.

FIELD EFFECT
COVALENCE

MEET COVALENCE COMPLETE

# The most sophisticated cyber threat monitoring on the planet, made simple.

## From threat detection to analysis and response, we've got you covered.

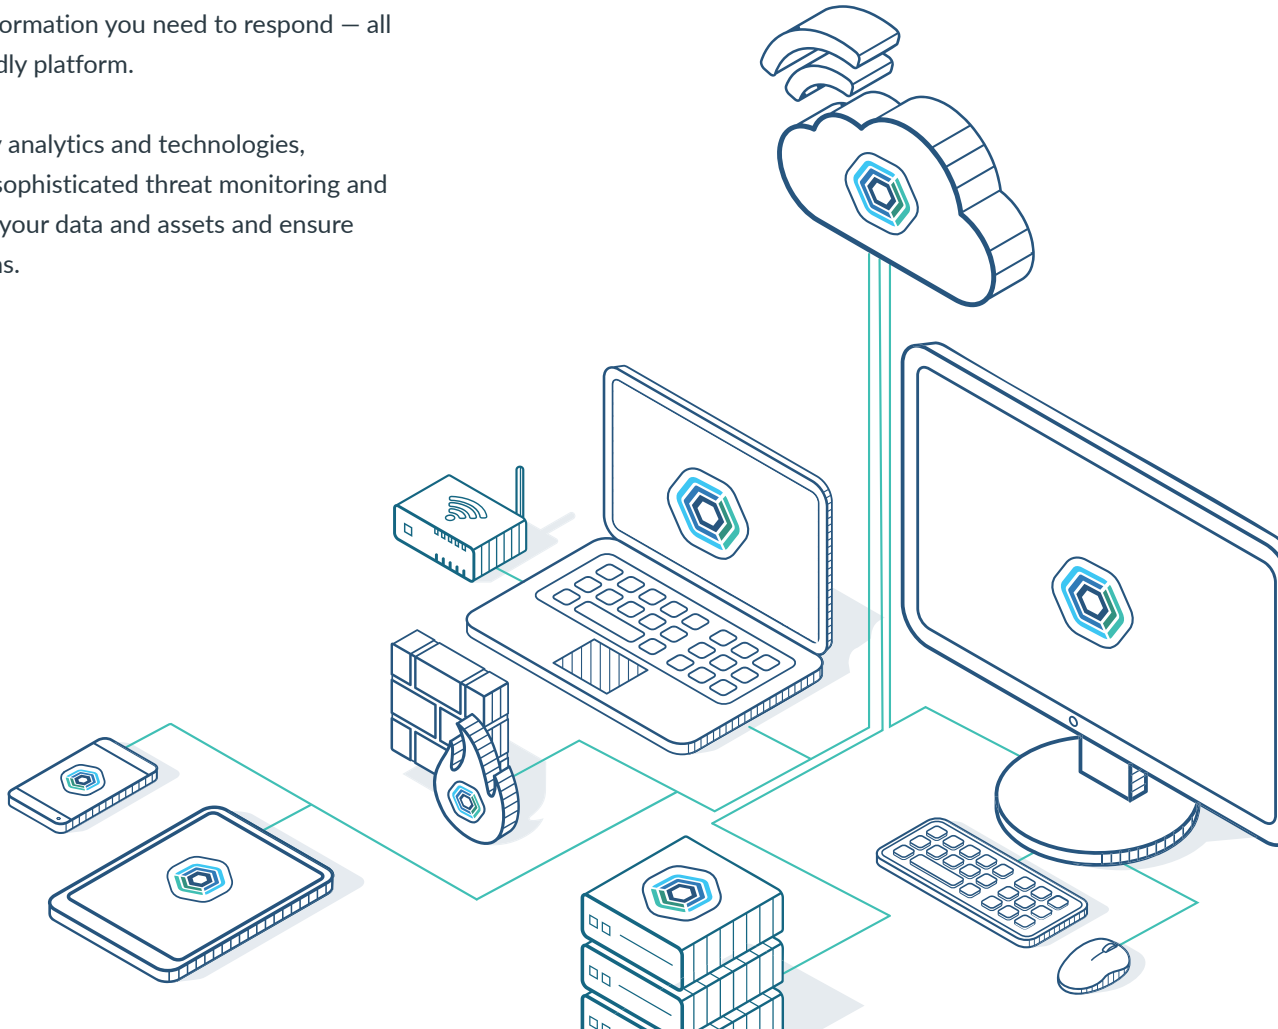
No matter the complexity of your network, the market sector you serve, or your budget, you'll see a difference with Covalence immediately.

Whether you have a team of two or 2,000, work in one office or several,  Covalence Complete pinpoints the cyber threats and vulnerabilities targeting your business and provides the information you need to respond — all from one user-friendly platform.

Through proprietary analytics and technologies, Covalence delivers sophisticated threat monitoring and detection to secure your data and assets and ensure continued operations.

What's more, Covalence gets even better over time. Our team is always improving its features and detection capabilities as new threats emerge — with all enhancements delivered to you as they're released, at no additional cost. This continuous improvement ensures complete protection for your business.

Discover the advantages of a managed, automated service with cyber experts by your side.



BENEFITS

# **Cyber security made simple** with all-in-one threat monitoring, analysis, and response.

We've made Covalence Complete to match the evolving needs of your modern business.

### EXPERIENCE 24/7 NETWORK MONITORING

Secure your network by identifying threats and potential vulnerabilities to your network traffic through sophisticated monitoring, alerting, analysis, and insights.

### SECURE ALL WINDOWS, LINUX, AND MAC ENDPOINTS

Protect your endpoints with practical insights into the configuration, operation, behaviour, vulnerabilities, and threats facing your Windows, Linux, and Mac platforms, IoT devices, and mobile services.

### GAIN ADVANCED CLOUD MONITORING

Use our cloud-native monitoring sensor to protect your company domain and cloud-based programs and applications, including Microsoft 365, Google Workspace, Amazon Web Services, Azure, Dropbox, Box, and Okta.

### BENEFIT FROM DOMAIN MONITORING

Protect against phishing and other potential attacks by monitoring and receiving alerts about activity by unknown users, to create and register similar domains.

### FORTIFY YOUR NETWORK PERIMETER

Rely on our DNS firewall to ensure safe web browsing and Internet access by blocking connections to malicious websites.

### SECURE YOUR MOBILE DEVICES

Integrate Covalence with your Mobile Device Management (MDM) services, including Microsoft InTune and VMware AirWatch, for end-to-end visibility. Custom Covalence mobile endpoint agents are also available.

### DISCOVER VULNERABILITIES AND RISKS

Recognize important changes to activity across your IT environment that may indicate risks, including misconfigured cloud services and unpatched software, to understand and improve your security.

### EXPERIENCE ADVANCED MONITORING AND ANALYTICS

Benefit from machine learning and analytic capabilities that provide continuous analysis of user and service data to identify and address threats. The result is realtime visibility to detect, monitor, measure, manage, and reduce attackable points from end to end.

### GAIN EXPERT THREAT HUNTING

Obtain better insight and security recommendations thanks to our expert threat hunters who dive deep into network and Covalence data to identify new, emerging, or otherwise undetected vulnerabilities and threats.

### EXPERIENCE ACTIVE RESPONSE

Rely on our expert analysts to automatically remediate active threats and compromises on your network. Our team isolates threats and compromises, and prevents spread across your endpoints.

### LOOK BEHIND THE SCENES WITH OBSERVER ROLE

Take a closer look at how we analyze data from your network, endpoint, and cloud layers to keep you secure. Observer role is an informational tool that lets you explore underlying indexed data to learn more about your IT environment.

## BENEFITS

### RECEIVE IMMEDIATE, EXPERT INCIDENT RESPONSE

Tap our expert incident response capabilities and customized IR service packages to quickly respond and recover from the unexpected. We identify the cause of incidents, make recommendations to eliminate threats, identify any other potential threats and vulnerabilities, contain threats and verify they no longer exist, and put your business on the right recovery path.

### MINIMIZE YOUR IMPACT WITH INCIDENT READINESS

Put the right preparation in place now to minimize the impact of a future security incident. Through our Incident Response (IR) Readiness Package, we identify improvements and the best practices and processes needed to prepare for potential incidents. We help you set the stage early on to respond quickly with less recovery costs and downtime

### PRIORITIZE SECURITY EFFORTS

Implement security controls, user policies, and education efforts through targeted insights and guidance from our intelligent Actions, Recommendations, and Observations (AROs) alerts and reporting.

### STOP SUSPICIOUS EMAIL ACTIVITY

Protect email communications with our Suspicious Email Analysis Service, enabling users to quickly forward any suspect emails to our cyber experts for fast analysis.

### ACCESS INTEGRATION FUNCTIONALITY

Use Covalence APIs and SDKs to easily integrate Covalence with other systems and provide monitoring and AROs alerting from one platform, including Simple RESTful API integration with the primary Covalence platform, advanced Python SDK and API to work with Covalence sensors, and integrations and add-ons for third-party products.

### ALIGN WITH CYBER SECURITY FRAMEWORKS

Experience advanced vulnerability discovery and reporting based on industry best practice frameworks, including the NIST Cyber Security Framework, ISO 27001, Canadian Centre for Cyber Security Baseline Controls (CCSC BC), Payment Card Industry Data Security Standard (PCI DSS), and Australia's ACSC Essential Eight Mitigation Measures.

### RELY ON EASY SET-UP, STATE-OF-THE-ART APPLIANCES

Choose from a range of Covalence appliances to complete your Covalence deployment and ensure sophisticated cyber security monitoring, detection, and analysis for your specific IT environment.

### ACCESS ROUND-THE-CLOCK SECURITY EXPERTISE

Get help every step of the way. Our expert cyber analysts are available for your security questions, providing the advice you need.

WE MAKE IT EASY

# Intelligent alerting. Guided remediation. **Expert counsel.**

## Say goodbye to confusing threat alerts, and hello to AROs.

Covalence's sophisticated monitoring and detection technologies and methodologies are transformed into actionable insights that help you quickly and proactively understand the response needed to secure your business.

We deliver analyst-verified threat data as simple, prioritized, actionable reporting that helps you understand your threats as Actions, Recommendations and Observations (AROs). Our proprietary approach removes noise to show you the alerts that matter with the context needed to resolve them.

Say goodbye to a volume of threat alerts that take hours to investigate. No security event logs to sort through. No more time spent gathering data across your network from multiple tools.

## What's an ARO?

### Actions

When immediate action is needed for an active or imminent threat that could compromise your network or devices, we will flag this as a required Action.

### Recommendations

If a suggested change is needed to your network configuration, software, or technology to address specific vulnerabilities or possible threats, we will indicate this as a Recommendation.

### Observations

Specific conditions or events in your network may be early indicators of malicious activity that could impact your cyber security. We report this as an Observation.

## Need help? We've got your back.

Like a professional concierge service, gain the peace of mind that comes from a dedicated team of experienced cyber pros and analysts providing expert support, counsel, and recommendations. From technical support to advice on security strategy, we're at your side to help you continually protect your business.

Experience the advantages of working with cyber leaders and technical veterans. Our team at Field Effect developed Covalence after years of research and development, applying decades of cyber analysis and technology experience from some of the most secure, complex, and fast-paced security environments in the world. We've also helped shape national-level cyber security policies.

## **Need more?** Let's find a Covalence product that fits **your business.**

No matter how your company evolves, you're in good hands. We have Covalence products and packages to meet your needs.

*Let's chat. We'll find the Covalence solution that's right for you.*

## About **Field Effect Software, Inc.**

Field Effect believes businesses of all sizes deserve powerful cyber security solutions to protect them. The company's threat detection, monitoring, training, and compliance products and services are the result of years of research and development by the brightest talents in the cyber security industry. Our solutions are purpose-built for SMBs and deliver sophisticated, easy-to-use and manage technology with actionable insights to keep you safe from cyber threats.

*Covalence products are designed to adapt with your business needs. The Covalence Complete product line includes Small Team, Professional, Business, and Small Enterprise packages.*
