

# Field Effect MDR Complete

For Lean IT Teams

## Cybersecurity clarity, purpose-built for your business

The need for cybersecurity has never been greater for organizations with lean IT teams. However, limited budgets and a lack of expertise paired with complex tools that were built for cybersecurity professionals make it difficult for most organizations to achieve an effective defense.

**Field Effect brings clarity to your cybersecurity**, combining the technology, people, and processes necessary to deliver a comprehensive defense without the cost or complications of traditional solutions. We handle the complexity behind the scenes, so you get the insights you need—nothing more, nothing less—to proactively manage cyber risk and stop attacks with confidence.

**Reduce risk** – We help you proactively improve your security posture by identifying and prioritizing vulnerabilities, risk, exposures, and more, with clear instructions for remediation.

**Stop attacks** - Consolidate 15+ tools and services in a single solution that is priced for you and your clientele while maximizing your resources and reducing labor costs.

**Streamline remediation** - Confidently respond to threats with Field Effect's jargon-free alerts, AROs (Actions, Recommendations, and Observations) accompanied by detailed remediation instructions and around the clock support.

**Eliminate the noise** – We automatically filter out 99% of alert noise so you only see those the ones that matter the most.

### Key Benefits:

- ✓ Extend the expertise of your team with a 24/7 SOC
- ✓ Stop attacks in real-time
- ✓ Proactively improve your security posture
- ✓ Eliminate noise and alert fatigue
- ✓ Confidently remediate threats with simple instructions
- ✓ Deploy quickly and easily

## Comprehensive Cybersecurity

|                                                                      |                                                                                                                                                                                                               |
|----------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Managed Endpoint, Network, and Cloud Detection &amp; Response</b> | Field Effect proactively monitors and investigates threats that would typically go undetected across your entire environment.                                                                                 |
| <b>24/7 Monitoring and Threat Hunting</b>                            | Field Effect proactively monitors and investigates threats that would typically go undetected across your entire environment.                                                                                 |
| <b>Threat Disruption &amp; Active Containment</b>                    | Field Effect Active Response will automatically respond to active threats on your behalf, based on your unique preferences and risk tolerance, to neutralize threats and prevent spread across your business. |
| <b>Active Blocking</b>                                               | Field Effect automatically blocks ransomware and malware with our natively built EDR (endpoint detection and response) and detects suspicious attacker behavior in real time.                                 |
| <b>Vulnerability Management</b>                                      | 24/7 scanning for vulnerabilities and risks such as outdated software patches, misconfigurations, weakened protocols, and more – which leave you exposed to threats and breaches.                             |
| <b>External Threat Monitoring</b>                                    | Field Effect monitors threats in your external threat surface like typo squatting domains or exposed services, that make you vulnerable to attack.                                                            |
| <b>Dark Web Monitoring</b>                                           | Get notified when your exposed business information appears on the dark web and eliminate the opportunity for attack with a monthly dark web scan or upgraded daily scanning.                                 |
| <b>Roaming DNS</b>                                                   | Fortify the network perimeter with a DNS firewall that ensures safe web browsing and Internet access by blocking connections to malicious websites.                                                           |
| <b>Suspicious Email Analysis Service (SEAS)</b>                      | Upload suspicious emails for immediate analysis of an email's content, metadata, and attachments. We will notify you within minutes if we see anything of concern.                                            |
| <b>Reporting</b>                                                     | Receive weekly and monthly reports that summarize issues found and the actions taken to resolve them as well as advanced insights to manage trending risk and compliance mappings.                            |
| <b>Log Retention</b>                                                 | Flexible and affordable data storage options to improve your ability to comply with compliance frameworks and your eligibility for cyber insurance.                                                           |

# Cybersecurity with clarity

Field Effect MDR manages the complexity of enterprise-grade cybersecurity on your behalf so you can empower your team to easily understand and manage your cyber risk – no matter their technical background.

1. Identify your top risks with Field Effect's contextualized alerts, called AROs (Actions, Recommendations, and Observations).
2. Focus on only the information that matters with high-fidelity AROs, summarizing all information in one place.
3. Confidently respond to threats jargon-free remediation instructions.
4. Achieve full peace of mind with 24/7 support that validates that your threats are successfully resolved.

# Unmatched support you can count on

With Field Effect, you get a true partner who is invested in your ongoing security improvement, allowing you to:

- Directly contact the security analysts who monitor your environment every day for incident support and any questions you may have.
- Work with our team to proactively improve your security posture with regular check-ins from our customer success team.
- Get expert guidance on any cybersecurity-related topic such as compliance, asset management, and more.

# Streamlined deployment

Field Effect's streamlined onboarding, encompassing simple click-to-enable cloud monitoring, industry-standard endpoint installers, and plug and play appliance (physical or virtual) will ensure you quickly achieve full deployment quickly and effectively.

Field Effect filters out 99% of alert noise so you only receive notifications that matter.

Delivered the 2nd fastest MTTD, with minimal alert noise.

Trusted by businesses like yours.

## About Field Effect

Every business deserves powerful protection from cyber threats.

Field Effect's cybersecurity solutions were purpose-built to prevent, detect and respond to threats for clients of all sizes. We take on the complexity behind the scenes and deliver a solution that's sophisticated where it matters, and simple everywhere else. Consolidate your tech and eliminate the noise while empowering users of all technical backgrounds to confidently navigate cybersecurity and avoid disruptions.

Complexity out, clarity in.
